

Unidad de fabricación de piezas mediante filament winding

Manufacturing unit of filament wound fiber reinforced composites with a 3 axis CNC machine, specific programming software developed by Gaiker. Rolling guiding system for carbon fiber. Oil heated impregnation bath, suitable for polyester, vinylester and epoxy resin systems. Postcuring oven with rotating system.

EKIPO ETA OSAGAI GARRANTZITSUENAK

- Horno de convección forzada
- Máquina de filament winding con 3 ejes CNC
